## Education

### Banasthali Vidyapith

Jul 2023 – Present

Bachelor of Technology (Information Technology)

CGPA: 7.82/10

Relevant Coursework: Data Structures & Algorithms, DBMS, Operating Systems, Object-Oriented Programming, Software Engineering, Web Technologies

## Technical Skills

**Programming Languages:** Python, C, C++, Java, JavaScript, SQL

**Web Technologies:** HTML, CSS, React.js, JSON, REST APIs

**Databases:** MySQL, MongoDB, Supabase

**Tools & Platforms:** Git, GitHub, Postman, Vercel, Netlify, Oracle VM VirtualBox

**Core Computer Science:** Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), Database Management Systems (DBMS), Operating Systems (OS), Software Engineering

**Development Practices:** SDLC, Agile Methodologies

**Additional Skills:** Web Scraping, API Integration

## Experience

### Software Engineer Intern | Findem

May 2025 – Jun 2025

- Developed Python-based web scraping solutions to extract leadership and company information from corporate websites.
- Worked with REST APIs, Git, Postman, MongoDB Compass, debugging, and data-processing workflows.
- Improved data collection efficiency and contributed to live engineering projects.

## Projects

### BanVerse | AI-Powered Student Platform - Link

*React.js, Node.js, Python, MongoDB Atlas, JavaScript, HTML, CSS, AI Chatbot, Vercel*

- Built an AI-powered student platform featuring chatbot-based grievance handling and recommendation systems.
- Led UI/UX design and collaborated within Agile teams to deliver a responsive user experience.
- Managed deployment using Vercel and contributed to development, testing, and integration.

### Smoky Weeks | Productivity Web Application - Link

*React.js, Vite, Supabase, JavaScript, HTML, CSS, Vercel, APIs*

- Developed a gamified productivity application that transforms real-world tasks into quests with XP and leveling systems.
- Implemented task tracking, leaderboards, achievements, and progress analytics.
- Collaborated on frontend and backend development to improve usability and scalability.

### ACE Your Day | Student Management System - Link

*C++, Object-Oriented Programming (OOP)*

- Built a student management application with academic tracking, scheduling, and productivity features.
- Integrated task management and planning functionalities to improve student organization.
- Applied OOP principles to create a modular and maintainable software architecture.

## Achievements

- AlgoUniversity Tech Fellowship 2024 – Ranked in the Top 4% among 20,000+ participants.
- Google Cloud Skills Boost Arcade 2025 – Completed 100+ cloud labs and earned Arcade Novice Tier.
- BanVerse ranked among the Top 30 projects out of 141 submissions at Banasthali Vidyapith.
- Secured 2nd Place in the BV-Literati Face Painting Competition.
