Objective

Final-year B.Tech. Information Technology student skilled in software development, data engineering, and web technologies. Interested in solving real-world problems and building practical technology solutions. Seeking opportunities to contribute to impactful technology projects, collaborate with cross-functional teams, and grow through hands-on industry experience.

Education

Banasthali Vidyapith

B.Tech – Information Technology

Jul 2023-May 2027

CGPA:7.82/10 (6 Sems)

Ryan International School

Class XII (CBSE)

2023 - 75%

Class X (CBSE)

2021 - 94%

Technical Skills

Languages: Python, C, C++, Java, JavaScript

Web: HTML, CSS, React.js, REST APIs

Databases: MySQL, MongoDB, Supabase

Tools: Git, GitHub, Postman, Vercel, Netlify

CS Core: OOP, DBMS, Software Engineering

Practices: Agile, SDLC, Web Scraping, API Integration

Experience

Software Engineer Intern | Findem

May 2025 – Jun 2025

- Used the company's web scraping tool to scrape data and verify whether their listed websites were providing data in JSON format, then exported the data to MongoDB Compass.
- Conducted DRA(data risk analytics) on the company's internal web application, identifying existing issues and suggesting potential feature improvements.
- Built a Python-based web scraping tool for leadership webpages to extract data and save it in JSON format.
- Developed a frontend for the scraper and integrated it into a Chrome extension, enabling direct access to scraped data without using the browser debugger or external links.

Projects

BanVerse | AI-Powered Student Platform

[Link](#)

React.js, Node.js, Python, MongoDB Atlas, JavaScript, HTML, CSS, Vercel, Oracle VM VirtualBox

- Built an AI-powered platform during pre-final year project work, to improve student club engagement within the university, featuring chatbot-based grievance handling and recommendation systems. Implemented user validation using Banasthali email IDs.
- Contributed to project deployment, presentations, testing, and feature improvements. Deployed the application on a virtual machine for the official demonstration and on Vercel to provide a stable and accessible deployment link.

Smoky Weeks | Productivity Web App

[Link](#)

React.js, Vite, Supabase, JavaScript, HTML, CSS, Vercel, REST APIs

- Developing a gamified task manager to help users improve their schedules, daily task management, and engagement with real-life work and responsibilities. The platform features XP/leveling, leaderboards, and progress analytics, and is designed to reduce unnecessary time-wasting activities and excessive scrolling.
- Building the full-stack application with deployment on Vercel. The project is currently ongoing, with additional features being developed and integrated.

ACE Your Day | Student Management System

[Link](#)

C++, Object-Oriented Programming (OOP)

- Built a C++ student scheduler during my 2nd year using OOP concepts. The application helps students manage daily tasks, to-do lists, assignments, attendance, and academic tracking. Included basic games to improve student engagement and our team(Project assignment) was ranked among the Top 15 out of 50 projects.

Certifications & Achievements

- **Google Cloud Skills Boost Arcade 2025** – Completed 100+ cloud labs; earned Arcade Novice Tier.
- **AlgoUniversity Tech Fellowship 2024** – Ranked Top 4% among 20,000+ participants.
- BanVerse ranked under Top 30 of 141 submissions at Banasthali Vidyapith, during (2025-26) project work of pre-final year (CS/IT/AIML).
- Secured 2nd Place, BV-Literati Face Painting Competition. (Theme-Mythology).
- Participated as a Filler (Anchoring) during the university Tech-Fest Mayukh in 2025 and 2026.
